	individual differences in motion of cognitive			
	processes of elementary school pupils;			
	4) to know conformities to law and theory of			
	process of educational cognition, modern			
	educational technologies;			
	educational technologies; 5) to know essence of the methodical			
	educational technologies;			

requirements specified in the vocational				
	requirements specified in the vocational Education Standard;			
	6) to know the content of normative documents			
	that regulate primary education: the State			
	Standard of primary education, subject			
	educational curricula of elementary school			
	pupils, assessment criteria of evaluation of			
	educational attainment of elementary school			
	pupils.			
	1) to use knowledge, ability and skills,			
Ability (Ab)	educational branches with the basis of the			
Ability (Ab)				
	requirements specified in the vocational			
	Education Standard of primary general			
	education with educational-cognitive and			
	professionally-orientated tasks;			
	2) to use methodologies of study of individual			
	features of motion of cognitive processes for			
	junior pupils;			
	3) to design the process of studies for junior			
	pupils of certain object : to develop the projects			
	of lessons and their fragments, methodology of			
	prosecution of separate types of tasks, to create			
	methodology of preparatory work,			
	acquaintance and forming of presentations and			
	concepts, abilities and skills with the objective			
	of capture of certain elements the content of the			
	program pupils; conduct lesson at elementary			
	school, the lesson review in relation to the			
	achievement of it objective and tasks, to			
	estimate efficiency of the applied forms,			
	methods, facilities and technologies;			
	4) to use monitoring of quality of educational			
	achievements of pupils from a certain theme; to			
	carry out control and evaluation of educational			
	achievements of pupils according to the criteria			
	of evaluation and in accordance with the State			
	requirements to the level of educational			
	achievements of pupils, certain in the program			
	from a certain object;			
	•			
	5) to design content and methodology of			
	realization of educator measures for the			
	elementary school pupils;			
	6) to conduct lesson at elementary school, the			
	lesson review in relation to the achievement of			

	it objective and tasks, to estimate efficiency of			
	the applied forms; 7) to plane of the professional activity			
	7) to plane of the professional activity,			
	realization of professional activity is			
	purposefully in a logical sequence.			
	1) to carry out communication, oriented on			
Communication (Com)	style of speech communication in the process of			
	decision of professionally-pedagogical tasks;			
	2) to forecast, to design and correct pedagogical			
	communication with other subjects of			
	educationally-educator process for the			
	elementary school on principles of ethics of			
	professional communication, applying the rules			
	of speech etiquette;			
	3) to use verbal communication for the sake of increase of level of professional culture of			
	increase of level of professional culture of			
	future teacher; to use foreign languages in professional activity			
	professional activity.1) acceptance of decisions in difficult and			
Autonomy and responsibility				
Autonomy and responsibility	unforeseeable terms, that needs application of new approaches and prognostication;			
(A@R)	new approaches and prognostication; 2) responsibilities are for development of			
	professional knowledge and practices,			
	estimation of strategic development of			
	command;			
	3) capacities are for further studies that largely			
	is autonomous and independent.			
8 – Resource support for the implementation of the program				
Specific characteristics of				
staffing	by scientific and pedagogical workers of the			
Starring	corresponding specialty having a degree and /			
	or academic rank and operating at the place of			
	work is more than 50% of the number of hours			
	specified by the curriculum; who have a Ph.D.			
	degree or a professor's degree – more than

Symbols for the matrix of providing programmatic learning outcomes by the relevant components of the educational program:

• – programmatic learning outcomes that are achieved;

O3j – compulsory courses of general training of the curriculum of a specialty;

B3j – disciplines of choice from the cycle of general preparation of the curriculum of a specialty;

 $O\Pi j$ – compulsory disciplines of the cycle of professional training of the specialty curriculum;

 $B\Pi j$ – discipline of choice from the cycle of professional training of the curriculum of a specialty;

3H – the serial number of the "knowledge" category in the list of programmatic learning outcomes in the program profile;

Вм – serial number of the category of "skill" in the list of programmatic learning outcomes in the program profile;

Комі – serial number of the category "communication" in the list of programmatic learning outcomes in the program profile;

AiVi – the serial number of the category "autonomy and responsibility" in the list of programmatic learning outcomes in the program profile.

II. Attestation

Student attestation carried out by the examination commission after the completion of education at the educational level in order to establish the actual compliance of the level of training with the requirements of the educational program. A system of programmatic learning outcomes, defined in the educational curriculum of a specialist, provide for the student's certification. Form of attestation: qualification examination or get of the bachelor's thesis.

The qualifying work involves conducting analysis and theoretical development (simulation and research of processes and objects) of actual issues, problems in the relevant field of knowledge. The list of qualification papers for a specialty determine by the graduation department at the beginning of the academic year. The subject of

qualifying works should be directly relate to the generalized object of the activity of a specialist of the corresponding educational level. The list of themes approve by the order of the rector before the beginning of pedagogical practice. Students have the right to offer their own topic for qualification work.

The task of the qualification work should reflect all the production functions and typical tasks of the specialist's work and must timely brought to the student (before the beginning of the pedagogical practice).

Managers of qualification works can be professors, associate professors of the graduation department, as well as leading specialists of the manufacturing sector of the relevant branch.

Attestation of applicants for higher education of a bachelor's degree carried out by an examination commission, which may include representatives of employers and their associations, in accordance with the provisions of the examination committee, approved by the Academic Council of Rivne State Humanitarian University.

III. System of internal quality assurance of higher education

The Rivne State Humanitarian University has a system for providing higher education institutions with quality of educational activity and quality of higher education (internal quality assurance system), which provides for the following procedures and measures:

1) definition of principles and procedures for ensuring the quality of higher education;

2) monitoring and periodic review of educational programs;

3) the annual assessment of higher education graduates, scientific and pedagogical and pedagogical staff of a higher educational institution, and regular publication of the results of such assessment on the official website of the higher educational institution, on information stands and in any other way;

4) ensure the professional development of pedagogical, scientific and scientific and pedagogical workers;

5) ensure the availability of the necessary resources for the organization of the educational process, including the independent work of students for each educational program;

6) ensure the availability of information systems for the effective management of the educational process;

7) ensure publicity of information about educational programs, degrees of higher education and qualifications;

8) ensure an effective system for preventing and detecting academic plagiarism in scientific works of higher education and higher education graduates;

9) and other procedures and activities.

The system of providing higher education institutions with the quality of educational activity and the quality of higher education, upon submission by the Rivne State Humanitarian University, can assessed by the National Agency for the Quality Assurance of Higher Education or independent institutions accredited by it. The

education system to determine whether it is consistent with requirements provision of quality education by the National Agency for the Quality Assurance of Higher Education, and international standards and guidelines for quality assurance.

Guarantor of the Educational Program, leader of the project's team

Koval Anna Petrovna, doktor of

pedagogical sciences, professor
