	lectures, multimedia lectures, interactive lectures,
	practical classes, laboratory classes, self-study, individual
	classes, consultations, preparation of coursework and
	theses.
Evaluation	Oral and written examinations, credits, defence of the
	report on practice, defence of course work, defence of the
	theses, certification.
6 – Program competencies	

Integral competence	The ability to independently and comprehensively solve complex
_	specialized tasks and practical problems in the field of development,
	training and upbringing of children of early and preschool age, using the
	theory and methods of preschool education in typical and uncertain conditions of the system of preschool education.
General Competence (GC)	1. Ability to productive (abstract, figurative, discursive,
deneral competence (GC)	creative) thinking.
	2. Ability to independently search, process and analyze
	information from different sources, to the free use of
	means of modern information and communication
	technologies.
	3. Ability to identify, formulate and solve problems,
	make decisions and act in accordance with moral and
	ethical and legal norms.
	4. Ability to plan, make forecasts and predict the
	consequences of their actions and the project
	organization of activities, to ensure the safety of their
	own and other participants in the educational process.
	5. Ability to have free communication and cooperation in
	the state and native languages (verbally and in writing).
	6. Ability to create a team, motivate its members and
	achieve common goals.
Special (Professional	
Competence (SC)	school age basic qualities of the person (arbitrariness,
	independence, creativity, initiative, freedom of behavior,
	self-awareness, self-esteem, self-esteem).
	2. Ability to develop children of early and preschool
	age as a means of communication and interaction with
	peers and adults, teaching children of early and preschool
	age in native and Ukrainian (state) languages.
	3. Ability to national and patriotic upbringing of

- 3. Ability to national and patriotic upbringing of children of early and preschool age (love to the Motherland, mother tongue, hometown, respect for state symbols of Ukraine).
- 4. Ability to form early and preschool children the skills of safe and environmentally sound behavior and activities in everyday life, nature and the environment.
- 5. Ability to physical development of children of early and preschool age, correction and strengthening of their health by means of physical exercises and motor activity.
- 6. Ability to organize and guide the game (leading), artistic and speech and artistic-productive (pictorial, musical, theatrical) activity of children of early and preschool age.
- 7. Ability to individual and differentiated development of children of early and preschool age with

special needs according to their possibilities (inclusive education).

- 8. Ability to organize and conduct educational and upbrining work with pupils of elementary school.
- 9. The ability to analyze the advanced pedagogical experience of elementary education and creatively introduce it into their work.

7 – Program learning outcomes

Knowledge (Kn)

- 1. Basic knowledge of fundamental sciences, to the extent necessary for the development of professional disciplines.
- 2. To understand and define pedagogical conditions, regularities, principles, goals, tasks, content, organizational forms, methods and means of preschool education.
- 3. To understand, describe and analyze the phenomena of development, education and upbringing of children of early and preschool age using basic psychological and pedagogical concepts and categories.
- 4. To understand nature and know the age peculiarities of children with different levels of development in norm, peculiarities of gifted children development, individual differences of children with special needs.
- 5. To understand and define ways to use in the development, education and upbringing of children of early and preschool age various types of activities (gaming, labor, educational, artistic, etc.).
- 6. To interpret the content and requirements of state documents and programs of preschool education, recommended by the Ministry of Education and Science of Ukraine, to choose adequate methods for their implementation.
- 7. To understand the peculiarities of the application of the algorithm of professional actions for the organization of educational process with children of early and preschool age in the conditions of the PEE and the family.
- 8. To understand the peculiarities of working with parents and other subjects of the educational process.
- 9. Basic ideas about the planning of educational and upbrinig work, taking into account the age and individual abilities of children of early and preschool age, children with special needs and make forecasts on its effectiveness.
- 10. Basic representations in the field of computer science and modern information technologies.

- 11. Basic ideas about the specifics of the system of education and education of children in different types of preschool educational institutions.
- 12. To understand the peculiarity of the organization and application of scientific research methods in the field of pedagogy and psychology.
- 13. To understand and define pedagogical conditions, laws, principles, goals, tasks, contents, organizational forms, methods and means of elementary education.
- 14. To know modern technologies of elementary education.
- 15. Basic knowledge of the Ukrainian language, mathematics, natural science, to the extent necessary for mastering the methods of elementary education.

Ability (Ab)

- 1. To analyze the pedagogical systems of the past and creatively transform their potential into the modern educational process of the PEE.
- 2. To build a integral educational process taking into account the basic laws of its course; to manage its quality, guided by the psychological and pedagogical principles of organization of educational process in the system of preschool education in the realization of the tasks of education, the goals of education and development of children of early and preschool age in the PEE and family.
- 3. Using skills and abilities to preserve and strengthen the psychophysical and social health of children.
- 4. To define tasks and contents of educational and upbrining work with children of early and preschool age on the basis of the current programs of preschool education.
- 5. To carry out subject and subjective interaction and developing interpersonal communication with children of preschool age and personal and socially oriented communication with parents.
- 6. To possess the technologies of developing a subjectgaming, natural-ecological, cognitive, and speech environment in different groups of early and preschool age.
- 7. To apply the whole spectrum of psychological and pedagogical means for realization of tasks of national, spiritual, physical, moral, mental, legal, labor, ecological, economic, gender, sexual, intercultural, aesthetic education of children of early and preschool age.
- 8. To introduce modern developing and information and communication technologies of education and training in

preschool educational process of educational the institutions, to predict their educational effect and to evaluate the achieved results. 9. To obtain optimal methods and effective forms and various means of pedagogical influence on children in the process of their education, training and development, and in specific situations of subject and subjective interaction of educator with children. 10. To carry out various types of planning in a preschool educational institution; to select the appropriate forms for plans for the implementation of the tasks of preschool education, and to draw up abstracts of various forms of educational activity taking into account characteristics and individual differences of children, leading factors of development, basic principles of preschool education and requirements for education and upbringing of children of early and preschool age. To have technologies of preschool inclusive education; to be able to organize group and individual education and education of children with special needs. 12. To solve issues connected with the organization of a developing educational environment of elementary school. 13. Effectively use educational technologies, pedagogical methods and techniques, means of teaching in the pedagogical process of elementary school. 14. Rational and scientifically substantiated organization of independent work of junior pupils; to monitor and evaluate knowledge, skills and abilities of pupils properly. 15. To carry out humanistic education in the process of organization of collective educational affairs and at the lesson. Communication 1. Ability to explain, demonstrate and defend a personal (Com) position in the field of development, education and upbringing of children of early and preschool age in the state language. 2. Use of foreign languages in professional activities. and 1. Decision-making in complex and unpredictable Autonomy responsibility conditions requiring new approaches and forecasting. (A&R)2. Follow the decisions taken and take responsibility for their results. 3. Ability to further education, which is largely autonomous and independent. - Resource support for the implementation of the program

- Вмј serial number of the category of "skill" in the list of programmatic learning outcomes in the program profile;
- Komj serial number of the category "communication" in the list of programmatic learning outcomes in the program profile;
- AiBi the serial number of the category "autonomy and responsibility" in the list of programmatic learning outcomes in the program profile

II. Attestation

Student attestation is carried out by the examination commission after the completion of education at the educational level in order to establish the actual compliance of the level of training with the requirements of the educational program. A system of programmatic learning outcomes, defined in the educational curriculum of a specialist, is provided for the student's certification.

Form of attestation: qualification examination or defence of the theses.

The qualification exam is a complex examination of the level of competence of graduates to the educational standard of specialty 012 "Preschool education" and includes questions on the technology of a modern elementary school lesson and technologies for studying educational branches in elementary school. It is conducted in oral or written form.

Qualification work on the specialty "Preschool education" may be pursued by a bachelor's degree in the form of a thesis and defended during state certification instead of a qualification examination in accordance with the procedure established by the Regulations on the organization of educational process at Rivne State Humanitarian University.

The list of diploma theses on the specialty is determined by the graduation department at the beginning of the academic year. Subject theses should be directly related to the general object of the activity of a specialist of the corresponding educational level. Students have the right to propose their own topic of theses. The assignment for the theses should reflect all the production functions and typical tasks of the specialist's activities and must be timely delivered to the student. Chiefs of theses may be professors, associate professors, senior lecturers of the graduate department, as well as leading specialists of the industrial sphere of the relevant branch.

The defence takes place as a public presentation of qualifying work, which may be attended by representatives of other educational institutions and / or employers.

As a result of successful protection, the applicant may obtain from the examination committee a recommendation for admission to the magistracy for training in the educational-scientific program of the second (master's) level of higher education.

III. System of internal quality assurance of higher education

The Rivne State Humanitarian University has a system for providing higher education institutions with quality of educational activity and quality of higher education (internal quality assurance system), which provides for the following procedures and measures:

- 1) definition of principles and procedures for ensuring the quality of higher education;
 - 2) monitoring and periodic review of educational programs;
- 3) the annual assessment of higher education graduates, scientific and pedagogical and pedagogical staff of a higher educational institution, and regular publication of the results of such assessments on the official website of the higher educational institution, on information stands and in any other way;
- 4) ensuring the professional development of pedagogical, scientific and scientific and pedagogical workers;
- 5) ensuring the availability of the necessary resources for the organization of the educational process, including the independent work of students for each educational program;
- 6) ensuring the availability of information systems for the effective management of the educational process;
- 7) ensuring publicity of information about educational programs, degrees of higher education and qualifications;
- 8) ensuring an effective system of preventing and detecting academic plagiarism in scientific works of higher education workers and higher education graduates;
 - 9) other procedures and measures.

The system of providing higher education institutions with the quality of educational activity and the quality of higher education (the system of internal quality assurance) may, upon submission by the Rivne State Humanitarian University, be assessed by the National Agency for the Quality Assurance of Higher Education or independent institutions accredited by it, for the assessment and quality assurance of higher education on the subject of its compliance with the requirements systems of quality assurance in higher education, approved by the National Agency for the Quality Assurance of Higher Education, and international standards and guidelines for quality assurance.

Guarantor of the educational program, project team leader

Associate Professor Pavlyuk T.O.
