**The matrix corresponds to the educational outcomes defined by the learning outcomes and competencies**

Program learning outcomes	Integral competence	General competencies						Special (professional) competencies								
		GC 1	GC 2	GC 3	GC 4	GC 5	GC 6	SC 1	SC 2	SC 3	SC 4	SC 5	SC 6	SC 7	SC 8	SC 9
Basic knowledge of fundamental sciences, to the extent necessary for the development of professional disciplines.	•	•	•			•		•		•	•				•	
Understand and determine pedagogical conditions, patterns, principles, goals, objectives, content, organizational forms, methods and means of preschool education.	•	•	•	•	•	•	•	•	•	•	•	•				
Understand, describe and analyze the phenomena of development, education and upbringing of children of early and preschool age using basic psychological and pedagogical concepts and categories.	•	•	•	•		•		•	•		•				•	
Understand nature and know the age-old peculiarities of children with different levels	•	•		•	•			•	•		•	•		•	•	

of development in the norm, peculiarities of development of gifted children, individual differences of children with special needs.																
Understand and define ways to use in the development, education and upbringing of children of early and pre-school age, different types of activities (gaming, labor, educational, artistic, etc.).	●	●		●	●		●	●	●		●		●			
To interpret the content and requirements of state documents and programs of preschool education, recommended by the Ministry of Education and Science of Ukraine, to choose the appropriate methods for their provision.	●	●	●	●	●	●		●		●						
Understand the peculiarities of the application of the algorithm of professional actions for the organization of educational process with children of early and preschool age in the conditions of the DHS and family.	●	●	●	●	●		●	●			●	●	●			
Understand the peculiarities of working with parents and other subjects of the educational process.	●	●			●		●				●					
Basic ideas about the planning of educational work, taking into account the age and individual abilities of children of early and pre-school age, children	●	●	●		●	●		●		●						

with special needs and make forecasts about its effectiveness.																
Basic representations in the field of computer science and modern information technologies.	•	•	•		•	•	•									
Basic ideas about the specifics of the system of education and education of children in different types of pre-school educational institutions.	•	•	•		•	•	•				•					
Understand the peculiarity of organization and application of methods of scientific research in the field of pedagogy and psychology.	•	•	•			•										
Features of development of children with psychophysical and speech disorders.	•	•		•				•	•			•		•	•	
Know the modern methods of diagnosing physical, mental and speech development of preschool children.	•	•	•						•			•		•	•	
Understand and determine pedagogical conditions, patterns, principles, goals, objectives, content, organizational forms, methods and means of special education.	•	•			•						•	•		•		•
To analyze the pedagogical systems of the past and creatively transform their potential into the modern educational and educational process of the DNZ.	•	•	•	•				•	•							

<p>To build a holistic educational process taking into account the basic laws of its course; to manage its quality, guided by the psychological and pedagogical principles of organization of educational process in the system of preschool education in the realization of the tasks of education, the goals of education and development of children of early and preschool age in the DHS and family.</p>	●	●		●	●		●	●	●	●	●	●				
<p>Use skills and abilities to preserve and strengthen the psychophysical and social health of children. Use skills and abilities to preserve and strengthen the psychophysical and social health of children.</p>	●	●		●							●	●	●			
<p>Determine the task and content of educational work with children of early and preschool age on the basis of current programs of preschool education.</p>	●	●	●	●	●	●		●	●	●						
<p>To implement subject-subjective interaction and developing interpersonal communication with children of preschool age and personally and socially oriented communication with parents.</p>	●	●		●			●	●	●	●	●			●		
<p>Own the technologies of developing a subject-gaming,</p>	●	●	●		●		●			●	●	●	●			

for the implementation of the tasks of preschool education, and to draw up abstracts of various forms of educational activity taking into account age characteristics and individual differences of children, leading factors of development, basic principles of pre-school education and requirements for education and upbringing of children of early and preschool age.																
Possess technologies of preschool inclusive education; to be able to organize group and individual education and education of children with special needs.	•	•	•	•	•	•					•	•		•		•
To resolve issues related to the acquisition and organization of special educational institutions for children with speech disorders.	•	•			•	•					•	•		•	•	•
Organize and conduct psychological and pedagogical study of children with peculiarities of psychophysical development.	•	•	•			•								•	•	•
To monitor children with violations of psychophysical development, to plan and carry out corrective and development work with them on the basis of a differentiated and individual approach.	•	•	•		•						•	•		•	•	•
Cooperate with	•	•		•	•	•		•			•			•	•	•

parents of children with speech impairments or those who replace them, specialists from other fields (doctors, psychologists, teachers, educators), promote social adaptation of children with disorders of psychophysical development.
